

Poultry Product Guide

Quality and Integrity

"The priceless ingredient in every product is the honor and integrity of the person who makes it."

Whether raising poultry is a hobby, or a way of living, we strive to meet your needs in providing quality products at reasonable prices. From baby chicks, laying hens, game birds, or even wild birds, we have the essential feeds you will need to make your animals happy and healthy.

In addition to our stock feeds, we also love to *formulate custom rations for our customers so you can get the exact standard that you are looking for in your flock. We've also got oyster shells, probiotics, electrolytes, and conditioning supplements for sale. No matter what you're looking for, our goal is to ensure that you've got exactly what you need.

***A minimum of 40 bags is required for custom formulas.**

GIVING YOUR FLOCK THE NUTRIENTS THEY NEED.

Your flock's growth, overall health, and the quality of eggs they produce is dependent on their feed diet. Having a complete feeding program will ensure their success. A complete feed ensures that nutrients are included at the correct levels so that there is no need to add any kind of supplements. A complete starter-grower feed is needed for baby and growing chicks until 18 weeks when your flock will transition to a complete laying feed.

• *Starter-Grower Feed*

To ensure your chicks' health and success, begin your chicks on our nutritious starter-grower feeds. Our starter-grower feeds are high in protein from natural plant sources, enhanced with probiotics, and fortified with added methionine and lysine. We also add Actigen from **Alltech** to aid gut health and support early growth.

Medicated vs. Non medicated

Complete starter feeds come medicated (with aprotium) or non-medicated. A medicated feed will help prevent coccidiosis in chicks that are not vaccinated. Use the non-medicated feed for chicks that have been vaccinated. Do not switch between medicated or non-medicated feeds, but keep feeding your chosen starter feed until the transition to a laying feed.

• *Laying Feed*

After 18 weeks, your hens require different nutrients as they begin producing eggs. The biggest difference in these feeds is calcium. If the calcium intake is not sufficient, hens may pull nutrients from their bones, causing their bone structure to decline. Your chickens need between 4 or 5 grams of calcium each day for their eggshells. Our laying feeds also contain Actigen from Alltech as well as natural plant extracts to help growth.

• *Ducks, Geese & Mixed Flock*

For mixed flocks, try our Game Bird Feed or Game Bird Pellets. Our Game Bird Feed has a 6 way grain and seed combination. Our Game Bird Pellet is high in protein, with probiotics and fortified with vitamins and minerals.

20% Chick Starter Grower Crumbles

MEDICATED

Benefits

Formulated for healthy growth in all chicks from birth to 20 weeks of age or until pullets start laying eggs. Ideal for use in hanging feeders. Available in 25 lb. bags.

Feeding Directions

Generally fed free choice with fresh, clean water. Consult your nutritionist about proper feeding directions.

Ingredients

Active Drug Ingredient:

Amprolium 113.5g/ton (.0125%)

Total Ingredients:

Grain Products, Processed Grain By-Products, Plant Protein Products, Animal Protein Products, Forage Products, Animal Fat, Butylated Hydroxy Toluene (a preservative), Iodized Salt, Ground Limestone, Ground Defluorinated Rock Phosphate Manganese Sulfate and Vitamin Supplement (Containing: Riboflavin Supplement, Vitamin E Supplement, Calcium Pantothenate, Niacin, Choline Chloride, Vitamin A Palmitate, D-Activated Animal Sterol, Vitamin B-12 Supplement, Di-Methionine, Menadione Sodium Bisulfite and Traces of Manganous Oxide, Copper Oxide, Ferrous Carbonate, Zinc Carbonate, Cobalt Carbonate and Stabilized Potassium Iodide

Black Oil Sunflower Seed

A great seed for all wild birds. Loaded with nutrients, omega 6 oil, and "Bird Kote" to help keep your feathered friends coming back!

Coastal Calcium & Poultry Shells

A calcium additive to be mixed into feed or fed free choice for laying hens that need extra calcium for egg production. Mainly for housed chickens that do not have access to grazing pasture to find the added calcium naturally.
